Course Resources

Getting Support

Please feel free to ask me any questions whilst going through the course. I'm here to help so if I can help you in any way, just let me know!

Other Documentation

Apache Maven website

The best resource is the Apache Maven website itself. The user guide there is very comprehensive (although is a little dense at times). There is a useful set of guides to Maven here:

https://maven.apache.org/guides

Feedback

If there are any extra lessons you feel would make this course better, or if anything is unclear or you'd like some specific examples or indeed have any suggestion for improvements, if you could let me know please by posting me a direct message that would be fantastic!

Also, if you wouldn't mind leaving a review please that would be great too! Thanks! ;)

Good luck with the course! Any questions, just ask.
